

MGT 530 Entrepreneurship Module 1, 2016-2017

Course Information

Instructor: Kevin Chastagner Office: PHBS Building, Room 721

Phone: 86-755-2603-2852

Email: kchastagner@phbs.pku.edu.cn

Office Hour: TBA

Teaching Assistant: TBA

Phone: TBA Email: TBA

Classes:

Lectures: Tue+Fri 10:30-12:20 Venue: PHBS Building, Room 225

Course Website:

cms.phbs.pku.edu.cn - Please locate our class and make sure you are able to receive notices.

1. Course Description

1.1 Context

Course overview:

Entrepreneurship is the study of new venture creation and management and it occurs in a myriad of ways depending on the interactions of the entrepreneur and the opportunity. This course, Entrepreneurship, provides a general overview of creating a business, ranging from opportunity recognition and evaluation to resource acquisition. The course is designed to appeal to individuals with strong desires to become entrepreneurs, to join startup companies, or to work in the venture capital industry.

Prerequisites:

None

1.2 Textbooks and Reading Materials

Required: Articles and cases as outlined in Section 3 of this syllabus. If the article or case is not publicly available it will be posted on the course website otherwise you will be responsible for finding the materials.

Supplemental:

Bruce R. Barringer and R. Duane Ireland (2012). Entrepreneurship: Successfully Launching New Ventures (Fourth Edition). Prentice Hall.

2. Learning Outcomes

2.1 Intended Learning Outcomes

Learning Goals	Objectives	Assessment
1. Our graduates will be	1.1. Our students will produce quality	Yes
effective	business and research-oriented documents.	
communicators.	1.2. Students are able to professionally	Yes
	present their ideas and also logically explain	
	and defend their argument.	
2. Our graduates will be	2.1. Students will be able to lead and	Yes
skilled in team work and	participate in group for projects, discussion,	
leadership.	and presentation.	
	2.2. Students will be able to apply	Yes
	leadership theories and related skills.	
3. Our graduates will be	3.1. In a case setting, students will use	
trained in ethics.	appropriate techniques to analyze business	
	problems and identify the ethical aspects,	
	provide a solution and defend it.	
	3.2. Our students will practice ethics in the	Yes
	duration of the program.	
4. Our graduates will	4.1. Students will have an international	
have a global	exposure.	
perspective.		
5. Our graduates will be	5.1. Our students will have a good	Yes
skilled in problem-	understanding of fundamental theories in	
solving and critical	their fields.	
thinking.	5.2. Our students will be prepared to face	Yes
	problems in various business settings and	
	find solutions.	
	5.3. Our students will demonstrate	Yes
	competency in critical thinking.	

2.2 Course specific objectives

The course objectives are threefold: 1) to develop a scientific understanding of entrepreneurship, the theoretical framework for that understanding, and the empirical evidence in support of theory; 2) to transform this scientific understanding to practice; and 3) to provide firsthand experience with start-up ventures and entrepreneurial uncertainty.

Upon completion of this course the student should have:

- 1) Knowledge to understand the entrepreneurial process: How to identify and pursue a business opportunity.
- 2) Tools to analyze various challenges: How to define the fundamental issues of starting a business? How to assess a venture's risks, problems, and rewards.
- 3) Skills to bridge the gap between theory and practice: How to transform ideas into action items. How to learn from your peers and role models. How to design and execute strategies.

2.3 Assessment/Grading Details

All work must be submitted as a typed hardcopy unless otherwise noted.

1: Class Participation	
2: Interview with an entrepreneur presentation	
3: Case Study Reports	
4: Reflection Questions	
5: Business Plan:	
Business Idea Page	
Written Report	
Presentation	

- 1: Class Participation (15%): For you to benefit most from the lecture and discussion, it is important that you prepare for each class session. To participate in class means to attend class regularly, to complete the assigned readings prior to each class, and to actively participate in class discussion in a professional and value-adding manner. This does not mean that I will call on you but your participation in class is tracked and used to calculate this part of your grade. Any peer evaluation that may happen in class can also be reflected in your participation score as it will relate to your professionalism.
- 2: Interview with an Entrepreneur (10%): Interview an entrepreneur and assess the venture he or she has started. The person your team interviews *must* have started his or her own business, or been part of the founding team. Success or failure of the venture is not important. Get a comprehensive understanding of the venture creation process and the role played by personal agency. In this interview, highlight the entrepreneur's background, how he or she recognized an opportunity to pursue, the factors that enabled the entrepreneur to grow the venture, and the reasons for exit. This is a group assignment. Each team will have to present their findings to the class. Further, you will need to record your interview and provide the instructor with a typed transcript of your interview (in English).
- **3: Case Study:** Your ability to function on a team and your ability to "sell" your work are essential skills for managers and entrepreneurs. For the case study, you will be randomly assigned to teams and you will apply what you are learning by analyzing realistic issues and managing team processes. To make these exercises more realistic, teams are expected to self-manage, and all team members will receive the same grade. You are encouraged to use resources OUTSIDE of the textbook. All team members should be actively involved in all processes. Each team will submit a written report (up to 4 pages) for each case. The purpose of these exercises is to help you to learn to think analytically about real business situations. Assignments are due at the beginning of the session listed. Late work will not be accepted.

The written report should include but not be limited to the following items:

- 1) Introduction of the company and the business
- 2) The managerial issue
- 3) Analyses of the issues in the case
- 4) Recommended solutions
- 5) Implementation plan
- **4: Reflection Questions (15%):** For each class where there is an assigned reading (not just a case) you will turn in a reflection on the readings. You should do one of the following with your reflection: 1) relate the work to your own personal growth, 2) discuss its meaning for your own business ideas or your team's business plan, or 3) relate the work to the course as a whole. The main goal is to integrate the ideas from the reading into the course and your learning. What you should not do is summarize the readings. You should apply the readings to another context or critically reflect on the implications that come from them.

5: Business Plan: You will be asked to form your own teams of up to 5 members to prepare for the following tasks:

Business Idea Page (5%): Each team will submit a memo (up to 2 pages) introducing a business idea and how each member will contribute to the group effort.

Business Plan Written report (20%): Each team will submit a final report (up to 15 pages). I will evaluate your final report based on effort/motivation, information, logic, and persuasiveness. Reports are due at the beginning of the session listed. Late work will not be accepted.

Business Plan Presentation (15%): Each team will present a business idea, provide its opportunity evaluation and offer a decision regarding to the future viability of the opportunity (approx. 10 minutes for the presentation and 5 minutes for Q&A). Entrepreneurship is more than just having a great idea. It is ultimately about convincing others, especially holders of critical resources, that your venture is seeking a value-creating opportunity and that your product/service will add value to their lives. Seen this way, how entrepreneurs present themselves and their product/service is critical to their success. In this spirit, you are urged to think creatively and engagingly about your presentation.

2.4 Academic Honesty and Plagiarism

It is important for a student's effort and credit to be recognized through class assessment. Credits earned for a student work due to efforts done by others are clearly unfair. Deliberate dishonesty is considered academic misconducts, which include plagiarism; cheating on assignments or examinations; engaging in unauthorized collaboration on academic work; taking, acquiring, or using test materials without faculty permission; submitting false or incomplete records of academic achievement; acting alone or in cooperation with another to falsify records or to obtain dishonestly grades, honors, awards, or professional endorsement; or altering, forging, or misusing a University academic record; or fabricating or falsifying of data, research procedures, or data analysis.

All assessments are subject to academic misconduct check. Misconduct check may include reproducing the assessment, providing a copy to another member of faculty, and/or communicate a copy of this assignment to the PHBS Discipline Committee. A suspected plagiarized document/assignment submitted to a plagiarism checking service may be kept in its database for future reference purpose.

Where violation is suspected, penalties will be implemented. The penalties for academic misconduct may include: deduction of honour points, a mark of zero on the assessment, a fail grade for the whole course, and reference of the matter to the Peking University Registrar.

For more information of plagiarism, please refer to PHBS Student Handbook.

3. Topics, Teaching and Assessment Schedule

The schedule below is subject to change with notification.
